

ALTO ELECTRIC RADIATORS

Alto electric radiators make heating possible in every room!

Main advantages

- Simple and intuitive operation
- Operated by supplied RF thermostat
- Boost function
- Open window detection
- ECO Design compliant
- Ready for installation and connection
- Easy pairing with RF Thermostat

RF THERMOSTAT
- INCLUDED -

Electric vertical radiator Alto E or the decorative version Alto Plan E

The Alto E is the electric version of our vertical radiator. It saves space due to its vertical design, and only needs a socket to quickly achieve a high heat output.

The Alto Plan E combines the advantages of a vertical electric radiator with a sleek and decorative appearance. With its flat front, it stands out in the most beautiful interiors, even in small rooms, which saves space.
